## CREATIVE WORKS

### Bachelor Degree Project, Cluj-Napoca Workplace/Company

02/2020 - 12/2020

#### Achievements

- For my senior thesis I wanted to recondition and improve the interface of the existing site of my University, as well as to achieve a better functionality of the electronic catalogs.
- To create the interface I used HTML, CSS and for functionality, I used JavaScript and JSON data.
- The creation of the site was done using VisualCode and involved the following steps: creating a modern interface, easy to understand and access by the user, with clear elements to facilitate navigation within the app , protection of personal data by presence of the two factors login page, the connection between the local JSON data server and my app, so that we can edit the fields of notes specific to each student, as well as save those changes via a button.

## EDUCATION AND TRAINING

### REACT JS: LEARN REACT FROM SCRATCH WITH HANDS-ON PROJECTS

Udemy

09/2021 - 10/2021

### THE COMPLETE JS COURSE

Udemy

06/2021 - Present
